STUDY TOOL / 05 / ALL LEARNING STAGES

The weekly study review

Make the next week more useful.

The idea

Choose one weak topic and one specific action. A useful review ends with something you can complete.

Your review for the week

Review prompt	Your note
One concept I can explain clearly	_____
Practice I completed independently	_____
One repeated mistake to correct	_____
My next topic and specific practice action	_____
When I will complete it	_____

For students: choose an action you can complete, not a vague goal such as “study more.”

For parents: ask your child to explain one concept, review one corrected error together, and protect the planned practice time.

Think it through

Can you name one repeated error from your latest test?

Answer: Write the exact step that went wrong, redo one question without looking at the solution, then choose similar questions for practice.

Use this short learning aid alongside your prescribed textbook, complete class notes and question practice.
